Description:

Review This book uses the natural curiosity of gifted learners who want to fully understand and take ownership of their experiences, and it provides structure by focusing topics in a sequential way. It has a marvelous approach to taking what students have learned and applying it to real-world situations. The book includes well-rounded projects incorporating technology, physical science, and life science . . . This book engages, excites, explains, and then envelopes. --Teri Consentino, NSTA

Recommends, October 9, 2011

About the Author Kenneth J. Smith, Ph.D., works at Sunset Ridge School District 29 in Northfield, IL, a suburb of Chicago. He currently runs the district-wide enrichment program. In 1995, Ken earned his Ph.D. in cognitive psychology from Columbia University in New York. He was an American Memories Fellow for the Library of Congress, and his articles have appeared in *The Middle School Journal* and *Gifted Child Today*.
